 **Byram**
HEALTHCARE®
Part of the Owens & Minor Family

Byram Healthcare's Caring Touch at Home™ Ostomy Program offers you:

Convenience

Ostomy Center of Excellence (COE): Our Ostomy COE consists of a team of dedicated people that are 100% focused on ostomy care. Their goal is to ensure people with ostomies resume a normal lifestyle. Our ostomy specialists are well trained on the latest ostomy products, stoma management techniques, insurance reimbursement and coverage issues.

Custom Cutting for Ostomy Skin Barriers:

At Byram Healthcare Centers, we provide the unique service of customizing ostomy skin barriers to the proper stomal opening for Byram customers. Byram can provide custom cutting on most types of two-piece ostomy skin barriers.

Latino Program:

Eliminates language barriers and improve access to care; all labels, printed material and phone lines are available in Spanish.

Ostomy Clinical Support:

The Byram Healthcare Ostomy Clinical CareLine is designed to support the needs of our current ostomy patients. Closely monitored by our contracted WOCN (Wound, Ostomy, and Continence Nurse), this CareLine is a great resource for anyone experiencing clinical trouble in regard to an ostomy. Our specialized Ostomy CareLine is a resource that can be used for clinical questions or concerns that pop up post discharge or between regular visits to your physician or hospital WOCN. For Ostomy support, please contact:

Product Support CareLine: 1-800-308-9445 ext. 43333 **Clinical Support CareLine:** 1-877-902-9726 ext. 43312 **Clinical Support CareMail:** clinical@byramhealthcare.com

Affordability

Reduce Patient Costs: Byram can service the majority of Americans with health insurance, including Medicare, most Medicaid and private insurances. Byram Healthcare is a Medicare participating provider. Our reimbursement experts will exhaust all available insurances to lower or eliminate your out of pocket costs. Should you not have insurance that covers ostomy supplies, we understand the financial burden this places on you. Byram is pleased to offer a discount off the cash purchase.

Choice

Extensive Inventory: Byram has one of the largest inventories of ostomy products in the country. We only carry brand name ostomy products from trusted manufacturers.

Brand Loyal: We fill the order as prescribed and require patient approval for any product changes.

Disclaimer: The reimbursement information provided by Byram Healthcare is intended to provide general information relevant to coding and reimbursement of Byram Healthcare’s products only. Coverage and payment policies for the same insurer can vary from one region to another and may change from time to time because of ongoing changes in government and insurance industry rules and regulations. Therefore, please confirm HCPCS Codes with your local DME-MAC, private insurer, or Medicaid agency before processing claims. Byram Healthcare does not guarantee coverage or payment of its products listed herein.

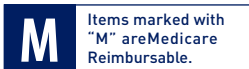

Byram is a Medicare participating provider. You are only responsible for any annual deductible, co-payment, or items not covered by Medicare, which Byram will bill to your Medicare Supplemental Insurance. Please see page 2 for additional information.

MEDICARE ASSIGNMENT

*No up-front out-of-pocket expense. If you have Medicare, Byram is a Medicare participating provider.

Byram will also bill your secondary insurance for the remaining 20%. You can relax, knowing our reimbursement experts will handle all of the paperwork and obtain prescriptions from your physician.

*On assigned items when billing co-payment to secondary insurance for full payment.

PRIVATE INSURANCE AND MANAGED CARE

Byram will work directly with your insurance company to ensure that you receive your full benefits. Since medical supply coverage and reimbursement varies by health plan, we will be happy to investigate your supply coverage with your insurance company.

MEDICAID

Byram participates in a growing number of state Medicaid programs. Our customer service representatives will be happy to discuss your particular state's coverage of medical supplies.

CUSTOMER SERVICE

Our ostomy specialists are committed to your satisfaction. Our representatives have extensive product and reimbursement knowledge to make ordering easy and convenient. If you do not see the product you are looking for in the catalog, or have any questions, contact our customer service department for assistance toll-free at **1-800-308-9445**.

SHIPPING

There is no charge for shipping on insurance covered orders. Most orders will ship the same day by FedEx Ground or through local regional couriers. This provides you with prompt, reliable nationwide delivery. Express shipping options are available.

PRIVACY POLICY

Byram adheres to state and federal laws complying with the confidentiality of business and customer privacy, including the federal HIPAA (Health Insurance Portability and Accountability Act) regulations. If you would like a copy of our Privacy Policy, please visit our website or contact us and we will gladly mail you our policy.

How many supplies will my insurance company pay for?

The table below outlines the quantity of supplies that Medicare will reimburse for in a given amount of time. Many health plans also follow Medicare’s guidelines. Higher quantities may be available, depending on specific medical reasons documented by your physician. Please contact your Byram Healthcare ostomy specialist at **1-800-308-9445** for questions specific to your insurance.

AMN=As Medically Necessary.

Byram Healthcare has interpreted Medicare policy in order to create the above reference information and assumes no responsibility for inconsistencies in the policy. All medical and claims determinations will be made by Medicare or your insurance plan.

Byram is a Medicare participating provider. You are only responsible for any annual deductible, co-payment, or items not covered by Medicare, which Byram will bill to your Medicare Supplemental Insurance. Please see page 2 for additional information.

Ostomy Manufacturer Programs

Before you left the hospital, your ostomy nurse may have enrolled you in a program to receive product samples and ongoing clinical support from one of the following manufacturers:

- Coloplast
- Convatec
- Hollister

Byram Healthcare participates in all of these programs. Even if you are enrolled in one of these programs, **you still have the right to choose your own supplier like Byram Healthcare to provide and bill your ostomy supplies to your insurance.**

To do so, just tell your ostomy product manufacturer when they call that you would like Byram Healthcare as your provider and they will transfer you directly to one of our ostomy specialists to place your order!

How Manufacturer Support Programs Work

1. Your stoma care nurse enrolls you in a manufacturer support program.
2. The manufacturer ships a sample kit to you within a few days and contacts you about their program.
3. You can specify Byram Healthcare as your medical supplier and they will transfer you directly to an ostomy specialist to place your order.
4. Byram Healthcare will ship supplies directly to your door and bill your insurance.

Caring Touch at Home™ Ostomy

FOUR EASY WAYS TO ORDER:

1. **CALL** Byram Healthcare:
1-800-308-9445
Monday - Friday, 8:30 AM to 7:00 PM Local Time
Saturday, 9:00 AM to 1:00 PM Local Time
2. **ONLINE** – Reorder your supplies at:
www.mybyramhealthcare.com
24 hours a day, 7 days a week
3. **FAX** us your order:
1-866-811-4500
4. **MAIL** your order form:
Byram Healthcare Centers, Inc.
Attention: Customer Service
3010 Woodcreek Drive - Suite A
Downers Grove, IL 60515

Please be sure to indicate your method of payment, if applicable, and your daytime phone number.

Byram is a Medicare participating provider. You are only responsible for any annual deductible, co-payment, or items not covered by Medicare, which Byram will bill to your Medicare Supplemental Insurance. Please see page 2 for additional information.

Pouching System Quiz

This quiz will help reinforce what you have learned about your pouching system. Please answer true or false for each statement.

Closed

T/F: Convenient because they can be thrown away when it's about half filled

T/F: Good option for colostomies of the lower intestinal region, where output is thicker

T/F: Can be used along with drainable pouches

Drainable

T/F: Opened at one end, can be emptied, rinsed, securely closed and reused

T/F: Best used for ileostomies and colostomies of the higher intestinal regions, which produce a more frequent, liquid or paste-like output

T/F: Available in different lengths

T/F: May have a built-in or separate tail closure

Urostomy

T/F: Designed for urinary stomas

T/F: Have a valve opening for faster, more convenient draining of urine and mucus

T/F: Can be attached to a drainage container at night

Disclaimer: The recommendations and information above should not be considered a substitute for personal medical advice or diagnosis. Before making any changes, consult your health care professional.

One-Piece System

T/F: Skin barrier and pouch are attached to skin together

T/F: No assembly and fewer steps to apply; generally more flexible

T/F: One connection point means fewer places for possible leakage

Two-Piece Systems

T/F: The barrier is attached to the skin, and the pouch connects to the barrier

T/F: Easier to switch to a different type of pouch

T/F: Easier to clean pouch

T/F: Less skin irritation from changing barriers

T/F: Allows stoma to be visible, making it easier to center the skin barrier

Opaque/Transparent Pouches

T/F: An opaque pouch is more discreet

T/F: Transparent material in a one-piece system can help you center the wafer onto the stoma

Cut-to-Fit/Precut Barriers

T/F: Cut-to-fit barriers allow you to customize the skin barrier opening to fit your stoma

T/F: Pre-cut barriers provide a consistent fit around the stoma

T/F: Pre-cut barriers perform best when used after your stoma has stabilized in shape

Filtered

T/F: Releases gas, but not odor

T/F: Prevents the pouch from ballooning and the need to “burp” the pouch

T/F: Good choice for colostomies with thicker output or when eating gas-causing foods

If you answered True to all of these statements, you are correct!

Getting to Know Your Ostomy

STOMA

Colostomy: Your large intestine has been re-routed so that your body wastes now exit through a stoma on your abdominal wall.

Urostomy: A small segment of your small intestine has been used to re-route urine through a stoma on your abdominal wall.

Ileostomy: Your large intestine has been removed and your small intestine re-routed so that your body wastes now exit through a stoma on your abdominal wall.

All stomas are basically the same, with the exception of size and shape. Your stoma should be red or pink. It is full of blood vessels, which are right on the surface. Your stoma should always be moist, similar to the inside lining of your mouth. It is a mucus membrane that has its own natural lubrication. Your stoma may bleed as it contains many blood vessels. At times when changing the appliance, you may see some blood; do not worry. Your stoma will mend itself, very much the same as when you bite the inside lining of your cheek or mouth. Your stoma has no feeling because it doesn't have nerve endings. The slight movement of the stoma is called peristaltic action. Your stoma will be swollen following surgery and may take from six to eight weeks to shrink. Measure your stoma at each appliance change during this initial period. The appliance must fit properly to protect the skin and to ensure a leak-proof seal.

LIFESTYLE TIPS

Generally, the best time to change your appliance is in the morning before breakfast. Examine the peristomal skin (skin surrounding the stoma). It should be the same color and texture as the rest of the abdominal skin. Avoiding skin irritation is much better than treating it.

You may take a bath or shower with your appliance on or off. Exposure to air, warm water and gentle soap is good for your skin. If you shower with your appliance on, the tape portion of the appliance will get wet. As the tape dries (you can blow dry with cool air or pat with a towel), it will remain secure on the skin.

Disclaimer: The recommendations and information above should not be considered a substitute for personal medical advice or diagnosis. Before making any changes, consult your health care professional.

CAN'T FIND WHAT YOU'RE LOOKING FOR? Byram carries thousands of quality brand-name products. If you can't find it in our catalog, contact one of our friendly Customer Service representatives by calling toll-free 1-800-308-9445.

Colostomy: Discharge from your colostomy can vary from a formed stool, pasty-like consistency or just liquid depending on where the stoma was fashioned in the large colon; ascending, transverse, or descending. Some stomas can be controlled through irrigation; some can be managed with a closed-end pouch while others require the use of a drainable-style appliance.

There are no definite diet restrictions for colostomies, however some foods will cause excessive gas such as broccoli, cabbage, eggs, fish, beans. Other foods may be constipating and still others may produce odor while emptying. Experiment with one food at a time so problem foods can be identified easily.

Urostomy: Using a night drainage system will assure a good night sleep! While some prefer to get up periodically throughout the night to empty, it is more convenient to hook up to bedside drainage. The pouch remains empty and you can rest without worry.

There are no specific dietary restrictions for urostomates, but certain food such as asparagus will cause the urine to have more odor. Certain juices such as grapefruit and orange go into your system acidic but exit the body in an alkaline state. Too much alkalinity can cause crystals to build up around the stoma. Cranberry juice is very beneficial in keeping alkaline levels in check.

Ileostomy: Chew all food thoroughly. Popcorn, peanuts, coconut and food with seeds or kernels should be eaten with discretion. Onions, cabbage, spicy foods, fish, garlic and beans may cause an odor when emptying the appliance. Green beans, broccoli, spinach, raw fruits and beer may cause diarrhea. Add one new food at a time so you can identify problems.

Know what medications you are taking; avoid enteric coated pills and time release capsules. These medications are usually not absorbed due to their outer coating. They may exit into the pouch in their original state. Remind your physician that you have an Ileostomy, which may necessitate a different choice of drug. You may discuss this with your pharmacist as well.

Disclaimer: The recommendations and information above should not be considered a substitute for personal medical advice or diagnosis. Before making any changes, consult your health care professional.

M Items marked with "M" are Medicare Reimbursable.

Byram is a Medicare participating provider. You are only responsible for any annual deductible, co-payment, or items not covered by Medicare, which Byram will bill to your Medicare Supplemental Insurance. Please see page 2 for additional information.

Custom Cutting Program

What is custom cutting?

Custom cutting is die-cutting the center opening of a wafer to fit the exact shape and size of your stoma.

When is custom cutting recommended?

Custom cutting is most beneficial six to eight weeks after surgery, once your stoma has shrunk and stabilized in size.

Benefits of Byram's custom cutting service:

- Provides accurate sizing and proper fit so less time is spent changing the appliance.
- A better fit translates into longer wear time.
- Decrease leakage issues and skin irritation.
- Less skin breakdown translates to fewer physician visits.
- Assists persons with arthritis, vision impairment, or finger/hand dexterity problems.

Custom Cutting Program

How to measure a stoma:

1. For oval stomas, the nurse/ostomate must provide the horizontal measurement.
2. The nurse/ostomate must also provide the vertical measurement.
3. The size now becomes, for example: $\frac{7}{8}$ " v x $1\frac{1}{4}$ "h

Measure down
(vertical)

Measure across
(horizontal)

1 ¼"

$\frac{7}{8}$ "

Problem Solving: Colostomy and Ileostomy

Many problems can be solved with simple home remedies or accessory products.

Are you experiencing problems with excess gas?

- Be careful with foods that are gaseous in nature: beans, cabbage, beer, etc.
- If possible, select a pouch with a filter (most closed-end and some drainable models incorporate a filter) or add a filter to your current appliance.
- Never puncture the material on the pouch, this destroys the odor-proof film and allows odor to seep out at will. You can also add a gas vent tab to the top of your bag to release air.

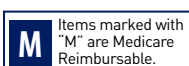

Are you experiencing problems with odor?

- Everyone using the bathroom creates an odor. However, stool or fecal material that is contained in an appliance for several hours builds up bacteria and may be more offensive when emptying.
- There are many good appliance deodorants on the market that can help neutralize odors within the pouch.
- Certain foods may cause more odor. You may want to avoid these if you'll be using a bathroom away from home.
- Please refer to the section in this book labeled "Food Which May Influence Stoma Function."
- To order or inquire about appliance deodorant, please call a **Byram Representative at 1-800-308-9445**.

Do you have difficulty in emptying or disposing of your pouch?

- Always place some bathroom tissue in toilet prior to emptying pouch contents. This will eliminate back splash.
- Place clip on the pouch so the end of the tail spout is facing upward (rather than under), this will allow easier emptying and directing into the toilet.
- Clean tail spout inside and out with tissue prior to applying the clip or securing the "Velcro-like" closure.

Disclaimer: The recommendations and information above should not be considered a substitute for personal medical advice or diagnosis. Before making any changes, consult your health care professional.

Byram is a Medicare participating provider. You are only responsible for any annual deductible, co-payment, or items not covered by Medicare, which Byram will bill to your Medicare Supplemental Insurance. Please see page 2 for additional information.

Problem Solving: Colostomy and Ileostomy

Do you have difficulty with stool or fecal material not dropping down in pouch?

- Leave a small amount of air in pouch when emptying; do not flatten pouch.
- Before applying the clip or securing “Velcro-like” closure, pull walls of pouch apart to trap a small bubble of air. This will prevent clothing from pressing down on the appliance.
- A lubricating deodorant can ease pouch emptying and help prevent pouch static and sticking. For more information regarding lubricating deodorant, please call Byram at 1-800-308-9445 .
- You may also want to talk to your doctor about using a stool softener to help thin out your stool. This may help stool fall into the bag more easily.

Are you experiencing problems with liquid drainage?

- Use a jelling agent to solidify drainage - contents will slide out easily. A Byram Representative can assist you in choosing a jelling agent to help thicken liquid stool. This will decrease noise and allow the contents to slide out more easily.
- Single use packets make gelling agents easy to use with each pouch change. You may want to wear an ostomy belt to help hold the wafer on more securely.
- Remember to place toilet paper into the toilet first to decrease splashing.

Disclaimer: The recommendations and information above should not be considered a substitute for personal medical advice or diagnosis. Before making any changes, consult your health care professional.

Problem Solving: Urostomy

Do you have problems with mucous clogging the valves?

- Mucous cannot be avoided since the urostomy is fashioned from the small intestine. Call Byram customer service for assistance at __1-800-308-9445 .

Are you experiencing problems with your night drainage tube?

- Always keep a small amount of urine in your pouch prior to connecting to night drainage. This will give an immediate flow of urine down the tube and break any air pockets.
- Be sure that the tubing is straight down the bed, or with a curl if placed on the side of the bed. Using a leg strap will prevent twisting and kinking of tube.

How can you wash pouches and night bag?

- There are a variety of appliance cleaners available for urinary systems. For ordering information, call Byram at 1-800-308-9445 .
- In a pinch, white vinegar and water can also be used to rinse out urinary pouches, and a baking soda and water solution is effective in night bags.

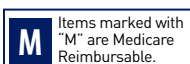

Does your tubing become discolored?

- Most night drainage bottles or bags are disposable in nature because they are very difficult to clean with long usage.
- To discuss available urinary appliance cleaners and decrystalizers call Byram custom service today for assistance at 1-800-308-9445 .

**Byram has the ostomy accessories you may need
to manage your ostomy easily and effectively.**

Food Which May Influence Stoma Function

Foods Which May Thicken Stool

May decrease stomal output and help in managing diarrhea.

| | |
|---------------|-------------------|
| Applesauce | Potatoes |
| Bananas | Rice |
| Milk, Boiled | Tapioca |
| Cheese | Whole wheat bread |
| Chocolate | |
| Peanut Butter | |

Foods Which May Increase Stomal Output

May cause an increase in peristalsis and may also be used as a means to relieve constipation.

| | | |
|-----------|----------------|-------------------|
| Alcohol | Fried Foods | Rhubarb |
| Beans | Fruit, Raw | Spicy Foods |
| Beer | Fruit Juice | Vegetables, Leafy |
| Broccoli | Iced Beverages | |
| Cabbage | Milk, Fresh | |
| Coffee | Onions | |
| Cucumbers | Prunes | |
| Figs | Plums | |

Foods Which May Discolor Fecal Output

If you notice a discoloration of the stool, think back to what you have eaten to note if food may be the cause. Call your doctor when stool discoloration is not food related.

| | | |
|-----------|--------------|-----------------|
| Beets | Licorice | Tomato Juice |
| Food Dye | Red Jello | Vitamins w/Iron |
| Iron Pill | Spinach | Watermelon |
| Kool-Aid | Strawberries | |

Travel Tips

Travel plans do not need any special attention other than careful preparation. However you travel, be sure to anticipate your needs.

Here are some travel tips to keep your journey relaxing.

- ✓ Create a detailed list of all the supplies you use; catalog numbers, sizes, description, cut size (a copy of your last Byram invoice will do the trick). Pack extra supplies but do not overload.
- ✓ While traveling, should an emergency arise, simply call us at **1-800-308-9445** for assistance. You can also look in the yellow pages under “Surgical Supplies.” Do not panic if you cannot find the model of appliance you are currently using; many brands are similar and can get you through this time.
- ✓ Always pack your supplies in a separate suitcase or carry-on and never allow this bag to leave your side. When traveling by car, avoid leaving supplies in your trunk, as excessive heat may cause wafers or other items to melt.
- ✓ Appliance wear-time may shorten in hot climates, so be prepared to change more frequently if needed.
- ✓ When traveling on planes, remember the restrictions on liquids for carry-on luggage. Put liquid deodorants or adhesives in your checked baggage or put some into less than 3 oz. travel containers.
- ✓ If you are going to be swimming, you may need to change your wafer more frequently. You may secure your wafer by “window framing” it with waterproof tape.
- ✓ The Transportation Security Administration offers a helpline to assist travelers with disabilities and medical conditions. **TSA Cares can be reached toll free at 1-855-787-2227** prior to traveling with questions about screening policies, procedures and what to expect at the security checkpoint.

The most common complaint of all travelers is a change in bowel habits due to different foods, unfamiliar water, schedule and time changes. Ask your physician for a prescription for diarrhea before leaving home. Drink only bottled water if possible and try new foods one day at a time.

Disclaimer: The recommendations and information above should not be considered a substitute for personal medical advice or diagnosis. Before making any changes, consult your health care professional.

Travel Communication Card

Compliments of the United Ostomy Associations of America, Inc.

This is provided to travelers in order to simplify communication with federal Transportation Security personnel and airline flight attendants, at those times when you wish or need to communicate in a non-verbal way, as is your legal right. This is not a “certificate” and it is not a “pass” to help you avoid screening.

Please trim to wallet-size and laminate if desired. The blue color is important, as it is a “flash-card” developed by the TSA so their own officers will recognize it and be guided to treat the traveler with discretion and sensitivity.

If laminated in a double-side manner, it can be used ‘blue side out’ during security screening, and the white side out when communicating non-verbally with airline personnel.

NEWS:

- You may always have a travel companion with you during a private screening
- TSA officers should NOT ask you to show your pouch—you may be asked to rub over your pouch outside your clothing so they can test your hand to rule out explosive residue.
- To file a complaint, send an email to TSA.ODPO@dhs.gov (with a copy to advocacy@uoaa.org, please)

Cut, fold and place with your travel documents

TSA NOTIFICATION CARD: INDIVIDUALS WITH DISABILITIES AND MEDICAL CONDITIONS

I have the following health condition, disability or medical device that may affect my screening:

I understand that alternate procedures providing an equivalent level of security screening are available and can be done in private. I also understand that presenting this card does not exempt me from screening.

Automated information offered in 12 languages

Call 72 hours prior to traveling to request the assistance of a Passenger Support Specialist (PSS) at the checkpoint. If a PSS is not available, you may ask for a Supervisory TSA Officer at the checkpoint.

****RESTROOM ACCESS NEEDED NOW****

The cardholder contains body waste in an **OSTOMY POUCH (stool/urine) and/or carries pouches and related supplies and/or a catheter to manage personal hygiene.**

S/he needs access to the restroom now in order to empty the pouch – this is critical for the cardholder’s well-being and for public sanitation.

 **RESTROOM COMMUNICATION CARD**

Provided by UOAA which promotes quality of life for people with ostomies and continent diversions through information, support, advocacy and collaboration.

United Ostomy Associations of America

YOU MATTER!

Know what to Expect and Know your Rights
Ostomy and Continent Diversion Patient Bill of Rights:

SIDE ONE

THE OSTOMY AND CONTINENT DIVERSION PATIENT BILL OF RIGHTS

This Patient Bill of Rights is a tool produced by United Ostomy Associations of America for patients to advocate for their own care. To achieve a desirable quality of life, a person needing ostomy or continent diversion surgery must have access to high-quality care in all healthcare settings and should receive appropriate education and support to promote optimal adjustment to surgery.

Counseling and Care in the patient bill of rights should be provided by a trained medical professional such as a Certified WOC/OstomyNurse/OMS/OCA.

SIDE TWO

Those needing ostomy/continent diversion surgery shall be involved in all phases of the surgical experience except in emergent situations and shall:

Receive preoperative counseling to include:

- Stoma site marking
- Discussion of care and impact on activities of daily living
- Emotional support

Receive during the operative phase:

- A stoma that can be fit with a quality functioning pouching system

Receive post-operative specialized nursing care to include:

- Education on self-care of specific ostomy/continent type (i.e., emptying/changing pouch,

care of skin, troubleshooting, dietary and fluid guidelines)

- Resources for obtaining supplies and connecting to community and industry support

Receive for lifetime care ongoing support including:

- Access to a medical professional trained in ostomy and continent diversion care in the outpatient setting
- Re-evaluation as needed from changes caused by aging and change of medical status

SENSURA® MIO FLEX TWO-PIECE SYSTEM

This flexible adhesive coupling fits to individual body contours and maintains a secure seal over uneven abdomens caused by scarring, skin folds, hernias, and other pouching challenges. The system features an elastic barrier to fit real body shapes and a full-circle filter to reduce ballooning. This product has a neutral gray textile for discretion.

After selecting the appropriate barrier, select the matching pouch by color i.e., “red” barrier matches a “red” pouch.

SENSURA® FLEX TWO-PIECE SYSTEM

SenSura® Flex is a unique combination of security and flexibility. A reinforced adhesive ring maintains a secure seal across the entire coupling surface. Integrated security channel offers extra protection against leakage. Complete conformability allows freedom of movement. Minimal application pressure provides for an excellent post-op solution.

After selecting the appropriate barrier, select the matching pouch by color i.e., “red” barrier matches a “red” pouch.

SENSURA® FLEX SKIN BARRIERS

SenSura® Flex Flat Skin Barrier

Standard wear barrier. Match barrier and pouch color codes for proper fit.

SENSURA® CLICK TWO-PIECE SYSTEM

The SenSura® Click combines the revolutionary double-layer adhesive with our secure click-lock technology. Patented click-lock coupling is leak-proof and secure. Audible click reassures that the system is locked in place. Easy-to-use coupling ring can be turned while unlocked. While unlocked, the pouch can be repositioned as well as the locking system. Application requires minimal pressure and can be removed with an "up and over" motion.

After selecting the appropriate barrier, select the matching pouch by color i.e., "blue" barrier matches a "blue" pouch.

SENSURA® MIO ONE-PIECE POUCH

The **SenSura® Mio** one-piece pouch is an innovative product from Coloplast, designed to fit the body's shape, providing a comfortable and secure experience. This product offers three brand new features:

- **Elastic Barrier:** SenSura® Mio was created using BodyFit Technology, and features an elastic barrier that fits to the shape of the body, providing a secure fit. The SenSura® Mio one-piece product allows for movement, because the barrier is able to stretch and move with the body without lifting from the skin or digging in to the skin.
- **Neutral Gray Textile:** The pouch material is made of a real woven textile, providing a comfortable feel against the body. This textile was designed in a neutral gray color, which is very discreet under clothing – even under a white shirt.
- **Full-Circle Filter:** The specially designed filter includes a full-circle shape with a large “pre-filter”. This pre-filter reduces clogging of the filter, and allows consistent air-flow to prevent “ballooning” of the pouch.

SENSURA® MIO DRAINABLE POUCHES

SenSura® Mio EasiClose™ WIDE Outlet Standard Wear Drainable Pouch

ASSURA® TWO-PIECE OSTOMY SYSTEM

The **Assura® Two-Piece Ostomy System** can be applied with minimal pressure to the barrier, and easily removed with just an "up and over" motion. When the system is locked, the pouch is safely and securely fastened to the barrier.

Assura® skin barrier flanges come in three types: Flat, Convex Light and Convex. They are available in either cut-to-fit or pre-cut. Match the color code of the barrier you select to the color code of the pouch you will use.

ASSURA® SKIN BARRIERS

Assura® Flat, Standard Wear Skin Barrier with Belt Tabs

Flat, flexible, spiral skin barrier, standard wear adhesive contains moisture-absorbing hydrocolloid. Lock-ring flange with attached belt tabs. Match barrier and pouch color codes for proper fit.

| Item | Order # | Cut-to-Fit | Color Code |

ASSURA® CLOSED POUCHES

Assura® Drainable Pouch with EasiClose™ WIDE Outlet and Filter

The EasiClose WIDE outlet pouch is extremely hygienic and secure for those with colostomies and ileostomies. The WIDE outlet makes emptying easier for those with thicker output. Filter option enhances discretion while controlling odor. New slick interior pouch film also makes emptying easier and faster. Velcro® dots on outlet creates a hygienic pouching system.

Two-sided comfort panels, filter.

ASSURA® AC TWO-PIECE SYSTEM

ASSURA® AC 2-PIECE SYSTEM

Assura® AC features a flexible, adhesive two-piece coupling system that conforms to the body and is easy to apply. This product offers the flexibility of a one-piece system and the convenience of a two-piece. To ensure the correct combination of two-piece barrier and pouches, match the baseplate color code to the color code of the pouch that will be used.

NOTE: Items marked * have custom peel rings.

Important: Patients with a clinical need for convexity, those with fistulas or skin folds that must be accommodated, and those who use an ostomy belt for support may not find this system to be appropriate for them.

ASSURA® AC BASEPLATES

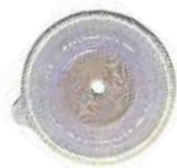

Assura® AC Flat Barrier

Adhesive coupling offers the convenience of a 2-piece with greater flexibility. Cut-to-Fit ensures exact fit around stoma.

Standard Wear Adhesive.

**“It’s so flexible.
It just moves
with my body.”**

Brittany, SenSura® Mio Convex user

Brittany is a SenSura Mio user who has received compensation from Coloplast to provide this information.

SenSura® Mio Convex

Brittany gained new comfort and confidence with SenSura® Mio Convex.

Brittany loves to stay active. She has an inward body profile and needs a product that stays in place and is comfortable to wear. **SenSura Mio Convex** is a good solution for her because it is specially designed for inward body profiles and body movement. Its elastic adhesive creates a reliable seal between the skin and barrier – and it is proven to reduce leakage!¹

Get your free **SenSura Mio** samples today:

📄 Go to www.coloplast.us/sensura-mio-convex and fill in the order form

📞 Call us at toll-free at **1-833-806-9893**

There’s a Mio for every body

SenSura Mio Convex is part of the SenSura Mio range. Try the online **BodyCheck tool** to find out which SenSura Mio system is right for you. Visit www.coloplast.us/bodycheck

1. Reduces leakage compared to Standard of Care. Walker et al. Raising the bar: New flexible convex ostomy appliance – a randomised controlled trial. WCET supplement 2016

SenSura Mio Convex has integrated flexlines in the center of its shell. These provide flexibility so the barrier can bend and stretch during body movement.

Why Select a Closed-End Pouch?

Closed-end pouches can enhance the quality of your life. Discard after use for easier self-care and improved cleanliness. There is no need for tail closures. They are covered by Medicare and most private insurance plans.

M

Items marked with "M" are Medicare Reimbursable.

Byram is a Medicare participating provider. You are only responsible for any annual deductible, co-payment, or items not covered by Medicare, which Byram will bill to your Medicare Supplemental Insurance. Please see page 2 for additional information.

ESTEEM synergy® TWO-PIECE OSTOMY SYSTEM

Esteem synergy® OSTOMY SYSTEM

The Esteem *synergy*® system utilizes innovative Adhesive Coupling Technology™ to connect the pouch with the skin barrier. It eliminates use of a plastic ring that must be snapped or locked together. This revolutionary two-piece product not only provides the versatility of a two-piece system, skin friendliness and low profile comfort but it also provides the flexibility of a conventional one-piece system. The flat, flexible adhesive foam ring on the pouch, securely connects with a clear, flat, flexible plastic "Landing Zone" flange.

For correct application, the barrier color code must match the pouch color code.

ESTEEM synergy® TWO-PIECE UROSTOMY POUCHES

Esteem synergy® Urostomy Pouch with Accuseal® Tap with Valve

Designed for easy manipulation and rapid emptying. The built-in anti-reflux valve resists the back flow of urine. Each box contains 2 Accuseal® night drainage adaptors.

Opaque with 1-sided comfort panel.

ESTEEM® + ONE-PIECE DRAINABLE POUCHES

The one-piece system that's gentle on the skin, while remaining secure and easy to use! Flexible and discreet, the Esteem® + one-piece system is the all-in-one solution that combines the skin barrier and pouch in a single unit, allowing for a simple, secure, and comfortable experience.

The Esteem® + one piece pouching system offers:

- A state-of-the art filter with an anti-clogging film layer, keeping the pouch flat while virtually eliminating odor
- InvisiClose® clipless tail closure with a strong hook and hook fastener
- The Lock-It Pocket™ which securely hides away the tail to provide the comfort of a closed end pouch
- Comfort panel pouch material that is soft and smooth against the skin, nearly rustle-free and resists water and dries quickly.

Request a **FREE** sample that's customized for you.

ConvaTec knows that there is no one-size-fits-all product that will work for every body or stoma. We'll ask you a few simple questions about your ostomy, then send you free product samples that will fit your body, so you can get back to doing the things that make you, you.

Visit convatec.com/ostomy or call 1-800-422-8811.

SUR-FIT Natura® TWO-PIECE OSTOMY SYSTEM

SUR-FIT Natura® Ostomy System features a low-profile locking closure system with security that patients can both feel and hear and many options that help patients to feel comfortable and confident. Options include: drainable or closed-end pouches with or without filters, Cut-to-Fit, Mold to fit or pre-cut skin barriers. Stomahesive® for effective adhesion on wet or dry skin, Durahesive® for extended wear and for those with liquid or semi-liquid output. For correct application, the barrier's color code must match the pouch color code.

SUR-FIT Natura® CLOSED END POUCHES

SUR-FIT Natura® Closed-End Pouch

Closed Pouch with flange is made of quiet, odor-proof film with soft, two-sided comfort panels. Flange features pouch tab and belt loops.

SUR-FIT Natura® SKIN BARRIERS

The Natura® + and SUR-FIT® Natura® Two-Piece Ostomy System is ConvaTec's most extensive two-piece product line. The SUR-FIT® Natura® Flange System signals a secure, accurate closure with a series of audible "clicks." A simple snap-off, snap-on design allows users to change the pouch quickly to match activities without removing the skin barrier from the skin.

The Natura® ostomy system offers special ConvaTec Moldable Technology™ skin barriers for a personalized, custom fit around the stoma to help protect skin. Another Natura® skin barrier option available is the Natura® Accordion Flange™ which lifts easily to provide generous finger room so coupling is easy and comfortable.

SUR-FIT Natura Low Pressure Adaptor

| Item | Order # | Flange | Color Code |

SUR-FIT Natura® SKIN BARRIERS**SUR-FIT Natura® Moldable Durahesive® Skin Barrier with Hydrocolloid Flexible Collar, white**

Extended wear barrier. Soft, pliable adhesive rolls to fit stoma size and shape. Mold-to-fit. No cutting necessary. Flexibility of the adhesive permits the skin barrier to adapt to changing stoma size. Will maintain a contoured fit during wear. Recommended for those with more liquid type output.

| Item | Order # | Flange | Stoma | Color Code |

Trap a Little Air!

When emptying a pouch, before you replace the clip, pull the pouch walls apart to trap a small amount of air. It will help drainage to drop down into the pouch.

NEW IMAGE™ TWO-PIECE OSTOMY SYSTEM

The **New Image™ Two-Piece Ostomy System** features a “floating flange” which permits the flange and skin barrier to move independently of each other. This mechanism enables an exceptionally secure attachment between the skin barrier and the pouch without causing pressure on the abdomen. An audible click confirms that the connection has been completed.

Choose the skin barrier according to the wearing time appropriate for you: FlexWear™ for standard wearing time, FlexTend™ for extended wearing time or CeraPlus™ also for extended wearing times. The CeraPlus skin barrier is designed to maintain adhesive properties, and features a proprietary formulation designed to help protect the skin’s own moisture barrier.

Be sure to match the color code of the New Image™ skin barrier with the color code of the New Image™ pouch.

Sometimes you see it,

Sometimes you don't

1 out of 3 people who experience itchy skin around the stoma have healthy looking skin.[†]

The CeraPlus skin barrier may help.

It helps protect against dryness, a possible cause of itching, by working to protect your skin's natural moisture barrier.

Try the CeraPlus skin barrier today!

The CeraPlus skin barrier comes in a range of fit options including one-piece, two-piece, flat, firm convex, soft convex, tape border, and tapeless

Prior to use, be sure to read the Instructions for Use for information regarding Intended Use, Contraindications, Warnings, Precautions, and Instructions.

Helpful Tips

- Always have extra pouches handy.
- Keep extra pouches and wafers assembled.
- Keep all supplies together or in one central location.
- Don't leave pouches and wafers in the car during hot or freezing weather.

Our ostomy specialists are committed to your satisfaction.

The Nu-Comfort Belt

Are you tired of a 1 inch wide belt that rides up or feels like a rope?
If the answer is “yes” consider our softer, wider belt.

Twice the width of
standard ostomy belts

Easy Velcro adjustment
on left & right

360° of support to entire
wafer

Extra support to the
peristomal area

In addition, supports
small peristomal hernias

Latex Free | Patent
Pending

14
Openings
Available

Nu-Hope™ SUPPORT BELTS
**HOW TO MEASURE FOR THE NU-HOPE
OSTOMY SUPPORT BELTS**

For large hernias and/or bulges that no longer reduce flat we recommend the Nu-Form belt.

For hernia prevention, pouch support and smaller reducible hernias, we recommend the Flat Panel belt.

In a lying position, measure the circumference of the body inline with the stoma. Select the belt that matches the length determined by your measurement. Belt width is determined based on area that needs support.

Belt openings are sized to the style or flange size of the pouch being worn. Add the corresponding letter to the end of the #.

Example: 6594-A would be a Small, 3" belt with a 2¾" opening.

Belt Opening Sizes / Add letter to #

Belt opening size is dependent on the pouching system worn.

| | | | |
|-------------|--------------|----------|-------------|
| 2" | E | 3 ¼" | C |
| 2 ⅛" | L | 3 ½" | T |
| 2 ¼" | F | 3 ¾" | M |

Nu-Hope™ Nu-Form Support Belts for Hernias

The Nu-Form belt is an all elastic belt designed to allow the elastic to support bulges and other body shapes naturally and comfortably.

- The belt comes in two types of elastic material: regular elastic and breathable Cool Comfort.
- Openings are available to fit most ostomy pouches on the market. The standard opening size is 2-3/8". To create an order number, simply add the letter of the opening to the end of the catalog number.
- Openings are centered vertically on belts 3" thru 6" wide so the belt can be worn for either a left or right sided stoma. Openings are placed 1-1/2" from the bottom for belt widths 7", 8", and 9".
- All belts can be modified; hole size, hole placement, belt length, etc.
- To add a Prolapse Overbelt add "P" to the item#, ie 2667-P. Prolapse overbelts are designed to support prolapsing stomas.

Regular elastic is plush on the inside against the skin and smooth on the outside against clothing. It's soft and recommended for sensitive skin.

Cool Comfort elastic is a lightweight breathable mesh elastic.

Nu-Hope™ SUPPORT BELTS

Nu-Hope™ Flat Panel Support Belts for Pouch Support and Reducible Hernias

Supportive and flexible panel around opening of belt provides support and aids in hernia prevention.

- The belt comes in two types of elastic material: regular elastic and breathable Cool Comfort.
- Openings are available to fit most ostomy pouches on the market. The standard opening size is 2-3/8". To create an order number, simply add the letter of the opening to the end of the catalog number.
- Belt widths of 3" or 4" come with centered openings. Belt widths of 6" and wider come with opening located 1" from the bottom of the belt.
- All belts can be modified; hole size, hole placement, belt length, etc.
- To add a Prolapse Overbelt add "P" to the item#, ie 2667-P. Prolapse overbelts are designed to support prolapsing stomas.

Regular elastic is plush on the inside against the skin and smooth on the outside against clothing. It's soft and recommended for sensitive skin.

Cool Comfort elastic is a lightweight breathable mesh elastic.

3" wide, 2 3/8" center opening.

How to Find the Right Size & Generate a Catalog Number

Fold the sides of the pouch inward as shown, take measurement across the center and + 1/8" or 1/4" depending on pouch.

Find the Ring Plate that matches your measurement and add its letter after the chosen belt elastic.

Example: NHBG2622B (2" Wide, Med, w/ 3" Ring Plate)

Ring Size.

F = 2 1/4"

A = 2 3/4"

C = 3 1/4"

G = 2 1/2"

DC = 2 7/8"

V = 3 3/8"

S = 2 3/8"

B = 3"

H = Med Oval**

I = 2 5/8"

U = 3 1/8"

J = Large Oval**

W = 2 5/8" x 3 1/8"

Q = 2 7/8" x 3 3/8"

** Fits Nu-Hope Oval Pouches Only

SKIN BARRIER PASTES

Coloplast Brava® Sting-Free Paste

Durable, moldable alcohol-free ostomy paste protects peristomal skin from stoma output without stinging the skin. Minimizes risk of maceration. Used to fill in uneven skin surfaces. Pectin-based.

M

| Item | Order # | Size |
|----------------------|----------------|-------|
| Tube HCPCS: A4406 | CT12050 | 2 oz. |

Coloplast Ostomy Paste

Used to fill in uneven skin surfaces to create a flat pouching surface. Provides tight sealing around the stoma. Protects against stoma output. Minimizes risk of maceration. Non-pectin.

M

| Item | Order # | Size |
|---------------------|---------------|-------|
| Tube HCPCS:A4405 | CT2650 | 2 oz. |

SKIN BARRIER PASTES

Coloplast Brava® Strip Paste

Pectin-based product, molded like putty, that protects peristomal skin from stoma output. Used to fill uneven skin surfaces to create a flat pouching surface. Alcohol-free and sting free.

M

| Item | Order # | Size |
|-------------------------------|----------------|-------------------------------|
| 10 strips/box HCPCS: A4406 | CT26555 | 2 oz. total (.2 oz per strip) |

ConvaTec® Stomahesive® Paste

Convenient, highly effective filler, sealant and protective skin barrier for colostomy, ileostomy or urinary stomas. Protects exposed skin around fistula sites and can be used as a filler for skin folds, uneven skin surfaces and scars. Natural, non-sensitizing ingredients help prevent skin irritation.

M

| Item | Order # | Size |
|---------------------|-----------------|-------|
| Tube HCPCS:A4406 | SQ183910 | 2 oz. |

Eakin® Cohesive® Paste

Alcohol-free adhesive stoma paste used to fill all crevices, skin folds and scars in order to create an even pouching surface. Helps form a waterproof barrier around the stoma. Can be used in conjunction with all Eakin Cohesive® Seals.

M

| Item | Order # | Size |
|----------------------|-----------------|--------|
| Tube HCPCS: A4405 | SQ839010 | 2.1 oz |

Fortis Entrust Skin Pastes with Pectin and Fortaguard

The Fortis Entrust Skin Pastes with Pectin and Fortaguard are formulated to handle high, liquid output as well as thick, heavy output. It is thick, yet pliable for ease in “caulking” around the stoma or filling in gaps, scars, folds and uneven skin surfaces. Can be used to hug the stoma and create a seal that expands to fill the empty space between the appliance and the stoma that can create leaks. Because stoma size changes even throughout the day, the paste helps maintain the seal for added security and user confidence. Specially created to be less sticky but tackier to create a good seal without unnecessary mess and residue on fingers and gloves.

M

| Item | Order # | Size/Type |

Coloplast Brava® Elastic Barrier Strips – Curved

Skin-friendly strips are used to "picture frame" around an ostomy barrier, providing extra security and peace of mind that the edges won't roll up. For round or oval barriers.

M

| Item | Order # | Size |
|---------------|-----------------|-------------|
| 20 strips/box | CT120700 | 5 1/2" long |
| HCPCS: A4362 | | |

Coloplast Brava® Elastic Barrier Strips-XL

A larger version of the original curved Elastic Barrier Strips, providing an increased feeling of security - even while being active.

M

| Item | Order # | Size |
|---------------|----------------|-------------|
| 30 strips/box | CT12076 | 6 3/4" long |
| HCPCS: A5121 | | |

Coloplast Brava® Elastic Barrier Strips – Y-Shape

Skin-friendly strips are used to "picture frame" around an ostomy barrier, providing extra security and peace of mind that the edges won't roll up. Extra-wide strips designed for users with varying body shapes, e.g. hernias or skin folds.

M

| Item | Order # | Size |
|---------------|-----------------|-------------|
| 30 strips/box | CT120721 | 5 3/4" long |
| HCPCS: A5121 | | |

Coloplast Brava® Elastic Barrier Strips – Straight

Skin-friendly strips are used to "picture frame" around an ostomy barrier, providing extra security and peace of mind that the edges won't roll up. For square or rectangular barrier shapes.

M

| Item | Order # | Size |
|---------------|-----------------|-------------|
| 20 strips/box | CT120740 | 5 1/4" long |
| HCPCS: A4362 | | |

SKIN BARRIER RINGS, SEALS & STRIPS**ConvaTec® Stomahesive® Strips**

Moldable, Standard Wear, two-sided adhesive strips.

M

| Item | Order # |
|--------------------------|----------------|
| 15/Box | SQ25542 |
| 3 cards of 5 strips each | |
| HCPCS:A4362 | |

**Eakin Cohesive® Seals**

Moldable hydrocolloid rings protect stomas and fistulas of all sizes. Forms a gel that helps prevent skin damage by sealing the area between the skin and ostomy appliance. Requires no cutting. Compatible with most ostomy devices.

M

| Item | Order # | Size |
|-------------|-----------------|------|
| 10/Box | SQ839001 | 4" |
| 20/Box | SQ839002 | 2" |
| HCPCS:A4385 | | |

**Eakin Cohesive® Slims™ Seals**

Moldable to fit all shape and size stomas. This hydrocolloid barrier forms a gel that helps prevent skin damage by sealing the area between the skin and ostomy appliance. Low profile for added comfort and discretion. Easy to remove for multiple pouch changes.

M

| Item | Order # | Size |
|-------------|-----------------|------|
| 10/Box | SQ839005 | 2" |
| HCPCS:A4385 | | |

**Eakin Cohesive® StomaWrap™**

Unique wrap shape makes it quick and easy to fit on the stoma. Ideal for large or oval shaped stomas.

M

| Item | Order # | Size |
|--------------|-----------------|--------|
| 10/box | SQ839006 | 3 1/2" |
| HCPCS: A4385 | | |

**ease™ Strips**

ease™ Strips help keep your skin barrier in place.

M

| Item | Order # | Size |

Fortis Entrust Conforming Adhesive Seal Skin Barrier Rings

Fortiguard is a patented process that utilizes sequestered hydrogen peroxide, a well-known antibacterial agent. Formulated to handle high, liquid output as well as thick, heavy output. It gently hugs the stoma and creates a seal that expands when exposed to moisture to fill the empty space between the appliance and the stoma that can create leaks. Because stoma size changes even throughout the day, the rings help maintain the seal for added security and user confidence. Specially created to be less sticky but tackier to create a good seal without unnecessary mess and residue on fingers or gloves. Three sizes to meet changing needs of ostomate.

SKIN BARRIER RINGS, SEALS & STRIPS

Fortis Entrust Crescent Barrier Extension Strips

Fortiguard is a patented process that utilizes sequestered hydrogen peroxide, a well-known antibacterial agent. Specially designed to have a strong adhesive but still be gentle to the skin. Three strips placed around the barrier in place of tape to “picture frame” the appliance will give the users additional security and possibly less leaks. Those with hernias may find it helps keep the appliance in place better for longer wear time. Heat from the skin activates the hydrocolloid for an even, secure fit.

| | H079603 | 1 1/2" x 2 3/16" |

**Hollister Adapt Barrier Extenders**

Easily frames the skin barrier, and the thin, flexible hydrocolloid formulation helps conform to uneven body folds and contours. This may help increase wear time, by reducing barrier edge lifting and increasing the adhesive coverage area. These may be beneficial for users who require an additional layer of security.
